Inside Your Outdoor

our parts

we start with great parts. using materials like stainless steel rivets, 3 cord thread and seat belt webbing.

Built for Good.

we are built for good.

Good **Purpose**, a women owned company that believes in taking care of one another and building a product that gives back to our planet.

Good **Experience**, together, outside we look toward enhancing your next adventure!

Good **Product**, easy to use and built to last TravelCharis are rock solid.

22 I WORKBOOK 202

2021 WORKBOOK L2:

our sum

We couple those quality parts with know-how, a purposeful manufacturing process and care that embraces all we have learned in the last 3 decades.

Then we put our goods to the test. We require that our testing capacity is 3 times greater than our weight rating.

Based on the below report from STR Labs, we arrive at TravelChair Math where 300lbs = 900 lbs and a sum that is greater than our parts.

big bubba **model 789FRV** static test weight (mass): 300 pounds (136.08kg)

drop height: 6" (152.4mm)

no instability or deformation after a load of 225 pounds was dropped on the seat.

dynamic test: the chair withstood failure up to a weight of 1,056 pounds.
